

# Powering Progress for a Sustainable Future

## Robust Pipeline GROWTH

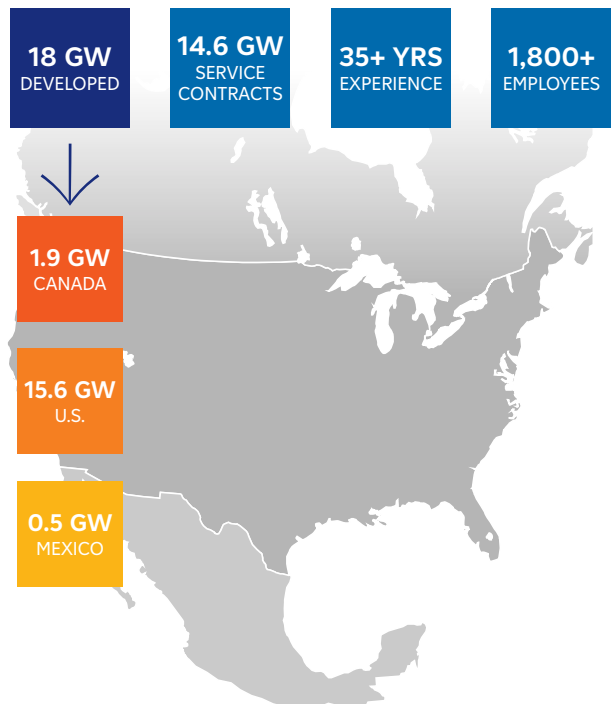

**42 GW**  
of development  
across  
North America  
(as of 12/2023)

EDF Renewables North America is a market leading independent power producer and service provider with over 35 years of expertise in renewable energy. The company delivers **grid-scale power**: wind (onshore and offshore), solar photovoltaic, and storage projects; **distribution-scale power**: solar and storage; and **asset optimization**: technical, operational, and commercial expertise to maximize performance of generating projects. The

company's PowerFlex affiliate offers a full suite of **onsite energy solutions**: solar, storage, EV charging, energy management systems, and microgrids.

EDF Renewables' North American portfolio consists of 18 GW of developed projects and 14.6 GW under service contracts and is a subsidiary of EDF Renouvelables, the dedicated renewable energy affiliate of the EDF Group.

## Creating value from Origination to Commercial Operation

EDF Renewables is a technology agnostic provider of renewable generation, storage, and management solutions.

### ORIGINATION

Comprehensive analysis, identification and evaluation of prospective sites and matching those sites with customer needs.

### DEVELOPMENT

Resource assessment, permitting, site design, interconnection rights and technology selections.

### TRANSACTION

Securitization of energy offtake and financing.

### CONSTRUCTION

Implementation of all aspects of the system design, installation, and construction to ensure a quality build.

### OPTIMIZATION

Operations and maintenance, asset management, monitoring and maintenance to ensure profitable and optimal performance of facility.

Let's talk energy.
